PREFACE

THE committee selected by the Regimental Association of the 79th Regiment of Indiana Volunteers to prepare the history of the regiment has completed its work, and submits it to the surviving members of the regiment and to the surviving representatives of our deceased comrades, and to all others who may be interested.

This has not been an easy task. The years of very active service of the regiment and the great events and battles in which it took a part make it difficult to write the history of the regiment without writing the history of the civil war of 1861.

After very careful consideration, the committee decided to limit its work to a narration of the experiences and service of the one regiment, so far as could possibly be done. One other question about which the committee was deeply concerned was to do justice to the individual men in the regiment in the record of honorable and dishonorable service. It was decided to present the muster-out roll of the field and staff and of each company, with the record as the officers of the companies had themselves made it at the time of the muster-out of the regiment.

The committee was impressed that there ought to be special mention made of the gallant and faithful service of many of the men who contributed to the honorable record of the regiment, and also special

mention of a few men who deserved to have the facts stated which would go to their discredit. But there was danger, in the absence of any record made by company officers on the muster-out roll, that injustice might be done in condemnation, and words of praise might be made too strong in some cases and not strong enough in others to do exact justice where commendation should be expressed.

The officers, by the course pursued, are in exactly the same condition as the enlisted men. It was determined to make the history tell the truth, and give the account of each day from the muster-in of the regiment to the muster-out.

At the beginning of the work, a circular letter was sent to every man in the regiment, asking for any record or diary kept by him or any one else to his knowledge, and also for any incident, for the truth of which he could vouch. By these means we gathered some records, most of them fragmentary and concerning special occasions or short periods of time.

Many incidents were also received, given by members of the regiment. Some of these incidents were a little too highly colored to be put into history; many of them, however, were interesting and important, but it became apparent that we would have to limit this history as it has been done, in order to prevent a large and expensive book.

The committee must acknowledge the great service and assistance received in this work from the diary kept by William H. Huntsinger, of Company "I," who had kept a daily record most of the time the regiment was in the service. Though he had died before this work was undertaken, his widow, who now lives at Afton, Iowa, responded to our circular by sending us this record, which she had. It had been written

with pencil mainly, and was so dim after thirty-four years that it was necessary to copy it, which was a very difficult thing to do.

The daily record, as given, is not an exact copy of that diary, but that was used and followed so far as it could be for information, and the work has been completed by resort to all the information and recollection of the committee and from members of the regiment.

It may appear to our comrades, individually, when they read this history, that they did not see some things that are recorded and did see other things of importance that are not recorded, but it should be borne in mind that no one of us saw everything, and each of us may be slightly mistaken in our recollection of some things occurring at the far-off days covered by this history.

The committee has given much time and great care to the preparation and presentation of this history. This they have done because parts of their own lives are in it, and their love for the 79th Regiment and their love for their dear old comrades has been in the work.

29. Monday. Ordered to march down the creek. Joined the division. Marched toward Murfreesboro. Crossed the bridge and arrived on the pike in a half hour. Reached the battlefield, within a mile of the rebel breastworks, and bivouacked.

30. The whole army was aroused at 5 A. M. Lines were formed, batteries placed in position commanding roads and the cavalry pushed forward on the flanks. There was slight firing on the outpost lines. During the day heavy skirmish lines, covering the front of the whole army, advanced and pressed forward, engaging the enemy's outposts. Reconnaissances found the enemy in force across Stone river. The fire of the skirmishers increased rapidly, and the artillery along the front opened fire occasionally, but there was no serious engagement. Dark, at 5 P. M., when the firing ceased. The casualties were few, and camp-rumors circulated that there were indications that the rebels were abandoning their position at Murfreesboro, retreating southward. The whole army bivouacked in line of battle. The weather cold, raw and intensely disagreeable. There was firing on the outposts during the night but no artillery firing. The night passed quietly.

31. The whole army was aroused at 5 A. M. and ordered into line. Arms were stacked and breakfast was cooked behind the stacks. The men were ordered to fill their canteens and be in readiness to march at any moment. The lines in reserve joined their respective commands. Immediately after daylight the 3d Division was ordered to move to the left. The other two divisions of the corps to follow at proper in-

tervals. The order of battle was for the 21st Army Corps to march to the left, crossing Stone's river; to advance until opposite and left of Murfreesboro, then by a turning movement to the right attack the enemy's right wing, double up his lines and push him on to his center. During this operation the center and right wing to remain in position until the turning movement on the left was executed, when the lines were to advance, attacking the enemy along his front. There was very little firing during the march to the left, and very little resistance by the enemy. When the position was reached from which the attack was to be made, the lines were formed, and strong skirmish lines pushed forward; heavy firing was heard, apparently on the right and rear of the Union lines, increasing every moment in intensity, and rapidly extending toward the left. In front of the left, facing the enemy's position in Murfreesboro there was no movement or action of any kind, not even a reply to the fire of the advancing skirmishes. At this time orders were received to countermarch by divisions and march rapidly to the right in the most expeditious manner possible. As soon as Stone's river was recrossed the brigades spread out, taking advantage of short cuts across fields to hurry forward. Where it was possible without interfering, or breaking up formations, the advance was made in double quick time. The distance to the right from Stone's river was fully three miles; such was the zeal of the troops that this distance was made very quickly, with the columns well closed up ready to form lines to move to the front. As the troops approached the right unmistakable signs of disaster became visible every moment. Artillery, ambulances, teams and groups of retreating soldiers flying in every direction to the rear. It then appeared,

from what could be ascertained, that the right wing, General A. D. McCook commanding, while eating breakfast, and while the artillery teams, unhitched and going to water, with no disposition to receive an attack or resist an advance, was surprised by the enemy in strong force and driven to the rear in great confusion, exposing the right flank of the army. The unexpected attack came with such suddenness and vigor that it was impossible to form lines to resist, and the enemy penetrated the position, capturing a large number of officers and men and much of the artillery, and driving the confused masses to the rear with irresistible force. Surrounded by the debris of McCook's corps streaming to the rear, Beatty's 3d Brigade, 19th Ohio, 79th Indiana, 9th Kentucky, and 11th Kentucky reached a point where the railroad intersecting the pike formed a triangle. Being the first to arrive, the 3d Brigade was placed in position, where it was intended to form the right of the new line. During this formation there was danger of the forming line being swept away by the retreating troops of McCook, and the lines had to be opened for their passage. As soon as the lines could be reformed, the pursuing enemy came in sight, debouching out of the cedar woods. The front line of the 3d Brigade, the 19th Ohio and 9th Kentucky, supported by the 79th Indiana and 11th Kentucky, in second line, opened fire upon the approaching enemy, firing volley after volley with such effect as not only to stop the advance, but bringing the enemy to a halt, struggling in vain to advance out of the cedar woods, which combat was vigorously continued until the ammunition of the front line was nearly exhausted, when the second line was ordered forward to relieve it. The front line opened ranks, and the second line passed to

the front, where, after firing a few volleys, it was ordered by General Rosencrans, who had been a spectator of the fight, to fix bayonets and drive back the enemy, promising support on the flanks. The advance was rapidly made, and prisoners were taken along the line, the enemy falling back to his original position. In the meantime, owing to a change of plan, the line was recalled and directed to a point on the right, where the Chicago Board of Trade Battery was in position on a slight elevation on a knoll, which became the center of the new line formed on the right of the center. Repeated charges were made upon this part of the line during the day, which were successfully beaten off by the infantry and artillery until night-fall, when the whole army reformed bivouacked in line of battle during the night. The night was bitter cold, and there was much suffering until the troops were allowed to kindle fires, when the army could cook its rations and the men warm themselves. There was very little firing during the night. The troops of both sides were willing to rest after the exhausting labors of the preceding day.

JANUARY, 1863.

1. Cold and gloomy. The 21st Army Corps was ordered to cross Stone's river and form on the left. Line of battle was formed, the artillery of the corps placed in position and strong skirmish lines pushed forward, but no advance ordered. During the day changes were made in the position, and the 1st and 2d Divisions of the corps were withdrawn across Stone's river to make closer connection with the left center. There was only slight skirmishing, with occasional cannon shots during the day, as the armies confronted each other. There was no serious move-

ment on either side. Ammunition was replenished and rations were issued. There was an alarm toward midnight, and lines were promptly formed. It was ascertained that the alarm was false, and the troops returned to their bivouacs.

2. Cold, cloudy and windy. Quiet all along the lines of both armies. After breakfast orders were issued for rigid inspection, and to put everything in serviceable condition. The whole forenoon passed away without any change of position of the 3d Division except that the 79th Indiana about noon was taken from its position and moved forward to fill a gap in the front line between the brigades of Fife and Price. No orders were given to Colonel Knefler of any kind, nor was he ordered to report for orders to either of the brigade commanders of the front line of the division. The afternoon until 3 o'clock passed without any other change of position or change in the formation of the 3d Division. There was slight firing occasionally on the right but no movement of a serious nature. At 3 o'clock the batteries of the 3d Division, one after another, were withdrawn from their positions and moved back across Stone's river to the rear and the division remained apparently dangerously exposed on both flanks, without artillery. It remained very quiet until about 4 o'clock when indications of a movement by the enemy forming in front became visible. The skirmishers in front opened fire, which gradually extended along the whole front, increasing rapidly in violence. The skirmishers began falling back on their lines and reported the advance of a large column of the enemy, seven lines deep and supported by many batteries. The skirmishers attempted to retard the enemy's advance, but were rapidly pressed back by the front line of the advancing column, composed of

the whole Breckenridge corps and its artillery. When the front became cleared of the skirmishers the whole 3d Division opened fire upon the enemy, but after a few well directed volleys, which inflicted severe loss upon the front line, the rebels brought the second line to the front which rapidly forced the 3d Division into retreat to Stone's river, pursued by overwhelming numbers of the enemy. As the 3d Division descended the banks of the stream and was crossing it, thus uncovering the pursuing enemy, a fearful discharge of many batteries, massed on the high bank commanding the entire position of the 3d Division and its line of retreat, swept the front clear of the pursuing enemy, who in turn fell back rapidly, this time pursued by the 3d Division under cover of the artillery on the bluffs and a heavy column of infantry on the right which had remained concealed until this time—Negley's Division. The enemy quickly rallied and the whole line retreated again to the banks of Stone's river pursued by the enemy whose advance was again stopped by the concentrated fire of the massed artillery and pursued again to the original position of attack. This maneuver was repeated the third time, when the whole line, reinforced by heavy bodies of infantry on the right and left, and batteries of artillery, drove the enemy from the field, who retreated into his defensive works on the right of Murfreesboro. When darkness came and the fight ceased, the 3d Division occupied about the same threatening position from which it was recalled to the right on the morning of the 31st of December, 1862.

3. Up early and in line. Heavy cannonading and musketry is heard on the right.

4. Up early. Heavy rains. Mud is very deep in camp. It is rumored that the rebels have evacuated

Murfreesboro and that the Union troops are marching into the town. The report is confirmed at night, occasioning great rejoicing. Missing men are reporting to the regiment. The loss to the regiment is 124—killed, wounded and missing.

5. Up early and ready for duty. The battlefield indicates a great loss of life. Will probably reach nine or ten thousand on Union side in killed, wounded and missing. Trees twelve inches in diameter are cut off in places, where fighting was hot. Horses are laying around killed in every possible manner. Details busy burying the dead. Rained hard all night.

6. Up early. A detail is made from the regiment to guard a bridge in process of construction across Stone river. Weather pleasant, but cold.

7. Up early. Marched at 6 A. M. toward Murfreesboro. Marched about two miles and arrived at the town. Marched through the lower part of town, then out on the Lebanon pike about two miles and went in camp in a wood near the road on rebel General Maney's place, Murfreesboro. Presents a very desolate appearance now, all business houses being closed and many private houses turned into hospitals.

8. Wagons came up to-day with our camp equipage and tents are put up. Volunteer surgeons came from Indianapolis, to attend on the wounded. The weather is damp and disagreeable. Men are recovering from their fatigue.

9. Up early. Men are taking it easy, resting and writing home.

10. In camp. Men are cleaning up their clothing, first time in two weeks they have had an opportunity.

11. In camp. Lieutenant Howe, of Company "I," detailed to command Company "E," the captain and

first lieutenant being wounded in the battle of Stone river. The second lieutenant is in hospital at Nashville.

12. In camp. Men are taking time easy and are ready for active duty.

13. Up early. Laid off camp and policed quarters. Regiment camped in a convenient and beautiful location; water and wood convenient; easily drained; guards are stationed about the camp, which is quiet and lonesome. It is observed that the battle had the effect of increasing sociability and good feeling among the men and officers.

14. Up at reveille. Camp guards are relieved on account of very hard rain. At 3 P. M. it rained harder than any time since the regiment marched into Tennessee; a dismal sleet followed in the morning. Several ladies came from Indianapolis as volunteer nurses.

15. Up at reveille. Had roll-call. It is very cold to-day, so cold it is almost impossible to keep warm. The ladies can not have a good opinion of soldiering, taking the weather as a specimen. Colonel Knefler does not approve of the presence of ladies in camp.

16. Reveille. Roll-call. The regiment detailed for picket. Marched out to the line. Company "E" is stationed at an elegant house, formerly occupied by a man now in the rebel army. The house was at one time luxuriously furnished. It is now stripped of everything, such as books, furniture, pictures, etc.; nothing is left but the bare walls.

17. Relieved from picket duty at 2 P. M. Marched to camp. The weather still very cold.

18. Reveille. Roll called. The men are building fire-places in their tents. The bricks were appropriated from some brick kilns near by camp, the property of some rebel.

19. Up at reveille. Roll-call at 5 P. M. Men are

busy completing chimneys in tents and making themselves comfortable generally. Preparing to take things easy.

20. Reveille at 5 A. M. Roll called. Camp guards stationed this morning. Raining. Very muddy.

21. Reveille at 5 A. M. and roll-call. Ordinary routine duties of camp resumed, policing and company drills as in former times. Men do not take much interest in company drills. Weather pleasant, but muddy.

22. Reveille at 5 A. M. and roll called. Mail very irregular, owing to a break on the L. & N. R. R. Cloudy and looks like rain. In Tennessee at this season it rains on an average every other day.

23. Reveille at 5 A. M. Roll called. Rumors of good news from the east. Grand victory by General Burnside reported.

24. Reveille at 5 A. M. Roll called. Camp guard is taken off. Regiment is detailed for picket and marched out to the line. The picket line is extended to the identical ground occupied by the rebels during the battle of Stone river. Broken guns, pieces of shells, etc., are laying around in abundance. Rained nearly all night.

25. Relieved at 2 P. M. Marched to camp. Weather damp and disagreeable. Men are anxious to go home. Desertions are reported quite frequent all over the army. Major Perry M. Blankenship resigned.

26. Reveille at 5 A. M. and roll called. Company drills and rest is all the men have to do. The sad diminution of the regiment does not tend to create cheerfulness. The hospitals are crowded with men who have succumbed to hardships, greatly reducing the effective strength of the army.

27. Reveille at 5 A. M. Roll called. The regiment is detailed for picket. Marched out to the line. The reason that the regiment is detailed for picket duty so often is on account of most of the division working on the fortifications around Murfreesboro.

28. Relieved at 2 P. M. and marched to camp.

29. Reveille at 5 A. M. Roll called. All quiet in camp.

30. Reveille at 5 A. M. Roll called. The regiment is detailed for picket. Marched out to the line. All quiet on the line. First Lieutenant John R. Cotton, "A" company, resigned.

31. Relieved at 1 P. M. Marched to camp. Weather is mild. Roads are very muddy and almost impassable. There is much sickness in camp. Many men are despondent and homesick. James A. Harris appointed and mustered in as captain of "A" company.

17. Reveille at 2:30 A. M. Ready to march. A corn-cob battle took place and got very hot until stopped by the colonel. This bivouac was a great place for snakes of the black and copperhead species. Assembly sounded, marched at 10 A. M. Arrived at the foot of Cumberland Mountains at 12 M. Assisted teams getting up. Roads are very rough. Reached the top at 6 P. M. and had a beautiful view of the valley and country for miles around. The roll called and started again, the boys yelling. Result of a raid on sutler wagon. Many baskets of champagne found in them. Marched. When arrived at the hill descending to Stony branch, halted for teams to come up and park. Orders to bivouac before lying down to rest. Orders came to march to brigade headquarters some distance off. Marched and crossed the branch. Bivouacked eleven miles from McMinnville.

SEPTEMBER, 1863.

1. Reveille at 3 : 30 A. M. Struck tents, packed up everything, loaded wagons, marched at 6 : 10 A. M. toward Dunlap. Stopped to camp at 1 : 40 P. M., having marched fifteen miles.

2. Reveille at 3 A. M. Marched at 6 A. M. Arrived at Dunlap at 9 A. M. Passed through and marched toward Jasper. Bivouacked at 4 P. M. Marched nineteen miles. Second Lieutenant Richard E. Perrott resigned.

3. Reveille at 4 : 30. Marched at 6 A. M. Brigade in front. Very foggy. Arrived at Jasper at 1 : 15 P. M. Stacked arms. Bivouacked, having marched thirteen miles. Rations of beef and other rations issued. Cartridges also issued.

4. Reveille at 3 : 30 A. M. Started at 5 A. M. with the teams, so as to meet the other part of the regiment. Marched toward Bridgeport. A detail of forty is made as advance guard. Marched five miles and came to the Tennessee river. Marched down the river and crossed Battle creek near where it empties into the Tennessee river. Marched to Bridgeport, arriving at 2 : 45 P. M. Could not cross the river. Marched down about one mile and bivouacked for the night.

5. Reveille at 5 A. M. Marched at 6 A. M. to the bridge across the Tennessee river, where the other part of the regiment was waiting. Crossed the river at 9 : 45 A. M. to an island, and at 10 : 20 A. M. crossed from the island. The pontoon bridge is 1,500 feet long, the first section to the island being 1,000 feet ; the other section 500 feet. Marched a few miles, and halted to allow the teams to close up. Marched again and camped about six miles from Bridgeport. Drew

three days' rations. Ordered to join the brigade. Marched very fast and caught up with the brigade. Marched very slow and unsteady by the side of a mountain for miles, where the road was only wide enough for two wagons to pass between the river and the mountain. Some of the teams rolled in the river. The railroad was up higher on the side of the mountain. Turned to the right among the hills and mountains over some very rocky road, making it unsteady marching, causing men to stagger as if drunk, it being dark. Halted in a corn field, in a hollow, between two mountains, about fourteen miles from Bridgeport. Bivouacked at 12:30 A. M. Marched half the night.

6. Reveille at 5:30 A. M. Marched at 8 A. M. Brigade in front of the division. Marched in a gap, and the road very bad. At 10 A. M. halted and stacked arms to rest. The ammunition train passed; also a large drove of beef cattle. The wagons kept passing in the night. Bivouacked for the night, having only marched two miles.

7. Reveille at 5 A. M. Rations of beef and bacon issued. Cannonading heard as if on top of the mountain. Halted all day waiting orders.

8. Reveille at 3 A. M. Regiment in the rear of division. Started at 5:45 A. M. and marched three miles. Stopped very often. Men who had no guns were ordered to carry stretchers and report to surgeons. Moved down about 100 yards further, and camped for the night.

9. At 1:20 A. M. the regiment was aroused without sound of bugle. Twenty rounds of cartridges were issued, to be carried in pockets, cartridge box being full. Ordered to march as quietly as possibly. The 79th Regiment in front of the brigade. Marched

through fields and hollows, over hills and down, waded creeks and streams. Toward morning got to the foot of Lookout Mountain. Started up the mountain by a path known as the Nicka Jack Trace. Companies "C" and "G" deployed in advance as skirmishers. Reached the crest without opposition. The skirmishers advanced toward the point. Halted and stacked arms at 7 A. M. The rebels had left a few minutes before. A signal station was established. On the mountain while waiting orders the regiment put in the time viewing magnificent scenery all around as far as the eye could reach. Filled canteens from Lula Lake, a body of water on top of the mountain. At 12:30 P. M. orders came to march to Chattanooga, which was reported to have been evacuated by the rebel army. Started and reached the point of Lookout at 3:30 P. M. The sight that here met the eyes was one never to be forgotten. Far down in the valley below was Bragg's whole rebel army marching on the roads out of Chattanooga leading south, raising clouds of dust, concealing them almost from view. The plateau of Lookout is so high (2,410 feet above the Tennessee river) that an army wagon in the valley below looks no bigger than an umbrella. The Allegheny and Cumberland mountains and Missionary Ridge are in plain sight. It is said that seven different States can be seen from the top of Lookout Mountain. When the whole division had assembled on the plateau, it was marched ten miles to the point, from the point five miles down to the town of Chattanooga by a fair road cut out of the side of the mountain. After resting the whole division marched down. When Chattanooga was reached the division turned to the right in the direction of where the rebels had been seen. When three miles beyond the town the regi-

ment bivouacked for the night, having marched twenty-four or twenty-five miles. The dust on the road out of Chattanooga was shoe-top deep, the whole of the rebel army having marched over the roads.

10. Reveille, 4:30 A. M. Marched, at 8 A. M., a short distance and halted. Marched again soon, and at 2 P. M. formed in line of battle in rear of the artillery, waiting for train to come up, as the troops were out of rations. Heavy skirmishing in front, where rebel cavalry in strong force made its appearance. About twelve miles from Chattanooga bivouacked for the night.

11. Reveille, 5 A. M. Marched, 6:30 A. M., toward Ringgold, skirmishing all the way with rebel cavalry. The artillery shelled the rebel cavalry at 9 A. M., and, retiring, they set the railroad bridges in front on fire as they retreated. Marched into Ringgold at 10 A. M., having marched six miles to-day; formed in line of battle, then by the right of company to the front, and marched about one-half mile through the woods along the railroad in a gap and halted to let Wilder's brigade of mounted infantry pass to take the front. Wilder shelled the rebels for two hours, and, it was reported, killed and wounded many of the rebel cavalry. Marched three miles beyond Ringgold, wading the creeks where the bridges were burned. In camp at 3:45 P. M. Pickets exchanged shots with the rebels all night.

12. Reveille, 4 A. M. Marched, 5 P. M., back to Ringgold, and, after resting, the division marched toward Chattanooga, about eight miles distant. Marched on another road about four miles, and camped about twelve miles from Chattanooga.

13. Aroused 4 A. M. Formed in line of battle to await developments. At 9 A. M. marched about one mile and came in sight of the enemy's skirmish line in

front. The brigade formed in line of battle. Colonel Knefler ordered to command skirmish line of division on both sides of the road. The skirmishers advanced, and, arriving on top of a ridge of hills bordering an open field, the enemy opened with artillery, about 11 A. M. The first shot struck just in front of the colors, passing under a fence behind which part of the regiment was in line, covering the men with dirt. The same shot or shell passed under the adjutant's and lieutenant-colonel's horses. The rebels had two pieces in the road, and had a good aim at the line. After the first shot, Captain Drury, of the 2d Wisconsin, ordered his battery in position by blowing a whistle. The battery came into position, and soon silenced the rebels with a few well aimed shots. When the battery came up Captain Drury was severely wounded and would have fallen off his horse, had not one of his lieutenants assisted him. The skirmishers pressed back the enemy for more than three miles, but their artillery fired very lively as they retreated. At 12:30 P. M. the line was halted, the object of the reconnaissance had been accomplished. At 3:30 P. M. marched back in the direction of the old camp. Crossed the river. Marched about one mile beyond and bivouacked.

14. Reveille 3 A. M. Marched at 8 A. M. toward the river, turned west instead of crossing, and marched toward Lookout Mountain about three miles. Halted and stacked arms in the shade. The men suffered much for water; none could be had. At 6:15 P. M. the bugle sounded. Marched around between hills in a gap about four miles. Halted and bivouacked at 7:45 P. M. ten miles from Chattanooga, a short distance from the foot of Lookout Mountain.

15. Reveille 4:30. Marched at 11 A. M., the same road marched over the night before. Marched five

miles, then turned south toward Lafayette, Ga. Marched one mile and the whole brigade formed in line of battle on the left of the road and went in camp at 2 P. M., about one-half mile from Crawfish Springs.

16. Reveille at 5 A. M. Issue of rations, shoes and clothing. General Rosecrans' headquarters at Crawfish Springs. The water comes out of a hill in a stream three feet deep and twelve feet wide, forming a river called Chickamauga.

17. Reveille at 3 A. M. In line until 4 A. M. Cannonading heard. Remained in this camp all day.

18. Reveille sounded at 5 A. M. A detail for picket was made at 8 A. M. Heavy cannonading on the right and left. The rebel artillery in position at short distance in sight of the picket line. The pickets ordered, if attacked, to fall back. The regiment marched to Lee and Gordon's mill, and about one mile down the river, and formed line of battle in a field overlooking the Chickamauga river or creek. Not allowed to have any fires, and it was very cold during the night. Heavy railroad trains heard moving all night in the enemy's lines.

BATTLE OF CHICKAMAUGA.

19. Reveille 4 A. M. Formed line of battle expecting an attack by the enemy. 5 A. M. the rebel sharpshooters had a range on the line and the regiment fell back to Lee and Gordon's mill. Ordered to eat breakfast. 8 A. M. the artillery on the line near our regiment opened on the rebels and rapid musketry followed. Rebel shells exploded uncomfortably close to our line. Heavy musketry is heard on right some distance away. 10 A. M. the artillery on our immediate right opened a heavy cannonading and continued

a half hour or more. The firing ceased for a short time, then renewed more vigorously than before. Very heavy musketry is heard on the right, indicating hard fighting. 12 m. artillery opened on rebel cavalry and scattered them. 1 p. m. heavy musketry and loud yelling is heard, indicating severe fighting. It is rumored that the rebels are driving the Union troops. Ordered to fall in promptly. Marched at double-quick time to the left, fixing bayonets while marching. 1:30 p. m. marched by the flank, in the woods. Our regiment charged a rebel battery and captured it. Its guns were loaded to the muzzle ready to be fired. The battery was taken to the rear by a detail from each company. A line was formed and a continuous fire was kept on the rebels. Soon the troops on our right gave way and exposed the right flank. The rebel balls coming lengthwise of the line, our line fell back in the rear of the 17th Kentucky, who began firing at the approaching rebel column, who came in such force that our lines could not stop them and fell back. At this time reinforcements came, and for the time the enemy was checked. Our line held its position for a while, but soon it became apparent that the rebels had again flanked our line as the balls came thick and fast from the right. Fell back in the rear of the artillery, which kept up a tremendous fire on the advancing rebel column and for a time checked their advance. The detail that had taken the captured battery to the rear reported to the regiment here and the line was reformed. The firing ceased on the left at 4:30 p. m. 5 p. m. a line of field works was built of rails on the hill where the regiment had taken position, which was about the same as occupied by our troops in the morning. The fighting continued severely until dark. It was nearly 7 p. m. before the firing ceased, only an

occasional shot was heard. Both sides rested till next morning.

20. Sunday. Awakened at 4 A. M. Cold and frosty. Nothing to eat but crackers. Ammunition issued. Fell in at 6 A. M. Marched into a hollow, where rations were issued. Heavy musketry is heard on the left, and is becoming heavier. At 9 A. M. marched in the direction from whence the firing was heard. Passed Generals Rosecrans and Van Cleve. Their looks were not very reassuring to the men. The regiment was formed at double column at half distance. Thus formed, marched to the front, balls and shells flying over our heads and among the men. The wounded were being carried to the rear. Ordered to lie down. In this position exposed to the missiles of the enemy. The regiment remained in this position until the line to our right was driven back in confusion. Then we fell back a short distance. Formed in support of a battery. The advancing column of rebels soon appeared, charged and captured the battery. A charge was ordered. The 79th Indiana, with the troops, charged and recaptured the battery from the rebels. This position could not be held very long. The troops fell back to a hill, formed a line connecting with other troops and held this position against the repeated charges of the enemy, who charged in column four deep, to be repulsed by the well-directed fire of our line. The regiment was engaged almost continuously until 2:30 P. M., when reinforcements came to the right, and the firing was again renewed. It soon ceased, however, and other troops occupied the place of the 79th Indiana. Vigorous firing was again heard on the right and extended along the entire line. The rebels fired shells and grape and cannister, but their aim was bad. They fired too high. Charge after

charge was made by the enemy on the temporary line of field works built on that hill, but General George H. Thomas's men (for it was he who was in command of the Federal troops on this hill), repulsed them as often as they came. The rebels were determined to capture the hill, as some of them were killed inside of our works, where a hand-to-hand conflict was had, with the result in favor of the Federal arms. The fighting continued until after dark, with our troops in possession of the hill called Snodgrass. Ammunition was given to the men during the afternoon. The cartridge boxes of the dead heroes were often emptied by the men who were out and could not get it elsewhere. It was expected the rebels would renew the attack after dark. They came not. Thus ended one of the hardest days in the experience of the 79th Indiana. The fragments of the regiment fell back down the hill in a hollow, the only way out. Marched quietly, gathering our men as we passed. The moon was shining brightly. Marched about six miles and camped for the night, almost exhausted for want of water.

21. Up at 5 A. M. After eating a bite and drinking a cup of coffee, started at 6:15 A. M., and soon came to where Van Cleve's division headquarters had been established. Heard the division had marched back to Chattanooga. Started for that place, arriving there at 12 M. Soon found the scattered men of the regiment and went into camp.

22. Up at 5 A. M. After breakfast the men were put to work fortifying, as it was expected the rebels would attack this place in the evening. Cannonading could be heard very plainly east of here. Worked very hard on the fortifications at 5 P. M.

22. The rebels shelled the pickets and were in sight

all evening, coming around on the left on a big hill, forming on the side of the mountain, with the intention to attack in the morning. Cannonading could be heard on the right all day. Burned the houses and brush that were in the way of a clear range for the firing line. The teams were sent across the river as fast as possible. A brigade was sent out to where the pickets were being shelled, where the firing of the rebel artillery could be seen. By sun-down the rebels were firing on our men between the river and the road. Firing was kept up until dark by the skirmishers. Worked on the breastworks after dark until they were in safe condition for protection; at 8 p. m. ordered out on picket. Went out half a mile and deployed the regiment on post, half of a company to each relief, and at 10 p. m. the rebels fired on the division pickets in front. Formed a new line and set the sentinels about ten steps apart and to stay on four hours. Watched for them all night, and were determined to give them a warm reception if attacked.

23. Relieved from picket at 10 a. m., and went back to the breastworks. Some other regiment had been working on them while the regiment was on picket, and got them in good condition, but worked and made them stronger. At 1:30 p. m. General Rosecrans rode along the lines, talking to the boys and cheering them up. Fell in line and gave him three cheers. Cannonading could be heard occasionally, and could see the rebel lines two or three miles off, passing along the side of the mountain. Each regiment had its flag planted on the breastworks in its front. At 2 p. m. were ordered to dig on a new line of works inside the other to shelter the reserve. Went to work, and never in the history of our regiment did the dirt fly so fast. We got the inside line done, and

lay down to sleep at 8 P. M. At 12:30 A. M. we were awakened to work on breastworks. Built an entanglement in front of the works to stop them, in case the enemy made a charge. Built fires when the moon went down, so as to make it smoky and foggy, so they could not see anything for a long time in the morning. Stopped working at 3 A. M. and stood in line of battle until daylight, another relief working in place. At 5 A. M. the artillery opened on the enemy, and kept firing for some time. General Rosecrans and other generals rode along the lines in the night to inspect the works, and their opinion was that we could hold the works against the rebels, and we thought so ourselves.

24. At 7:30 could hear musketry very plainly in different directions, but it ceased. At 9 A. M. blankets were brought to regiment. Had only rubber blankets. It was cold without woolen blankets. The sutler came up and brought a good many things the boys needed. Still worked on the breastworks in the fort. At 2 P. M. the artillery fired several times on the right at the rebels. At 3:30 P. M. the guns in the fort fired at a battery that the rebels were getting in position to fire. At 4:15 P. M. the artillery on the right was firing again. Drew rations of beef. At 4:30 P. M. the cannons in the fort and on the right began firing at different points at the rebels. Could hear musketry also. Stopped working in the fort at night and went to sleep at 7 P. M., not knowing how soon we might be called up. At 10:15 P. M. awakened and fell in line inside the breastworks. Heavy musketry could be heard on the right. At 10:30 P. M. the artillery opened on the enemy. Fires were built in front of the breastworks, and a wire had been stretched about one foot off the ground to trip the rebels in the event

they charged the works. The firing ceased at 12 M., except a few occasional shots. We lay down to rest.

25. Up at 6 A. M. Ordered to police the ground inside of the works, and to put up tents.

26. Up at daylight. Heard considerable firing on the picket line in front. Knapsacks came up at 8 A. M. Ordered to work on the fort, and at 11:30 P. M. the work was completed. The ditch in front was eight feet wide and four feet deep. The fortification was fifteen feet through at the bottom, sloping to about ten feet on top. It is considered secure against any ordinary artillery. Beef issued, but the amount was very small.

27. Sunday. Reveille, 5 A. M. Few shots are heard along the lines. At 9:45 P. M. there was sharp firing on the right for half an hour. Ordered to form line, expecting an attack. Firing ceased. Ordered to retire.

28. Reveille. Ordered to prepare camp and pitch tents. In line at 7 A. M. Details of six men ordered from each company to make another row of entanglements in front.

29. Reveille. Issue wormy crackers, unfit to eat. Rations are beginning to be scarce. Ordered to exercise caution and not throw them away. The enemy sent in a flag of truce to take off our wounded. It is reported five hundred ambulances and medical attendants sent out with ten days' rations for the wounded. George W. Clark, first lieutenant "G" company, died of wound received September 13, 1863.

30. Reveille 5 A. M. Nothing important.

OCTOBER, 1863.

1. Raining. Reveille 5 A. M. Thirty-pound Parrott guns mounted in the work in front of lines.

2. Reveille 5 A. M. Camp routine. Rebels can be seen on drill and dress parade on Missionary Ridge. Their drums and bugles are plainly heard, and the calls could be distinguished.

3. Reveille 5 A. M. Policed quarters. Our pickets are exchanging papers with the rebels every day.

4. Sunday. Reveille 5 A. M. Two days' rations issued ordered to last three days. Supplies becoming shorter every day. Company inspections at 4 P. M.

5. Reveille 5 A. M. Heavy cannonading all day on both sides. Some of the rebel shells explode over the fort in front, long range.

6. Reveille 5 A. M. Company inspection and stacked arms. Dug out a rebel shell that failed to explode, it proved to be a 42-pounder. Fort in front has been named "Fort Wood." Position of regiment to the left of the fort. Light cannonading during the day. Rain at dark.

7. Reveille 5 A. M. The guns in the fort opened on some rebels who are supposed to be planting a siege gun in front. Rations are getting more scarce.

8. Reveille 5 A. M. Regiment reserve of the picket line. Brisk cannonading on the right. The rebels opened on the pickets with their artillery at 4 P. M., the shells lighting close to the picket line. Guns in Fort Wood responded. Some of the shells exploded over Missionary Ridge three miles distant. Rebel cannon could not reach fort. Pickets ordered not to fire unless the enemy advanced or manifested disposition to advance, when fire is to be opened; reserve to reinforce line of sentinels; if hard pressed by the enemy, firing line to be supported by grand reserve of regiment, and in case of necessity to call out brigade, and report situation to headquarters of division. Firing ceased at dark. On account of proximity of

enemy utmost vigilance and caution enjoined upon all, while on outpost duty.

9. Relieved at 9 A. M. Rations growing scarcer.

10. Reveille 5 A. M. Cannonading on the right. Drew five days' rations. Strictest economy with rations impressed upon all.

BATTLE OF MISSIONARY RIDGE.

23. Reveille at daylight. Detail made for fatigue duty, to report at 7:15 a. m. The river very high. Cannonading on the right from our batteries and firing from Fort Wood. Four more men detailed for fatigue duty during the forenoon. Everything in perfect readiness to move to the front. Ordered to fall in at 2 p. m. Marched outside of the breastworks and formed on left of division by battalions en masse. At 2:30 p. m. the pickets advanced and began firing. At 2:35 p. m. the guns in Fort Wood opened fire. Heavy

firing of artillery on the right and brisk skirmishing could be heard all along the lines. At 3 p. m. deployed in line of battle and marched forward a short distance and halted. At 3:10 p. m. musketry is heard in front of the brigade, but on the right the skirmishing was lively. Shells passed over our lines while the brigade was in the thick woods of scrub oaks and underbrush, making it difficult to advance. Railway cars can be heard on the other side of Missionary Ridge. Rebel wagon trains can be seen moving up the mountain, crossing over to the other side. The guns in Fort Wood ceased firing for a few minutes. About 3:30 the 1st and 2d Brigades reached the top of the knoll a few yards to our right. The men hauled the 6th Illinois Battery to the top of the knoll, and the battery shelled the rebels. The rebel batteries were on top of Missionary Ridge and fired very fast, the shells exploding in front and all around the men. Ordered to lie down. There was heavy skirmishing all along the lines. Lay in line until dark, when the cannonading ceased on both sides. Cloudy and cool and sprinkling rain. At 8 p. m. bivouacked and large fires were kindled. Company "I" detailed to work in the rifle pits, the axes, picks and shovels having been brought up. Men of other commands had been at work on a line of rifle pits. Soon as the knoll had been taken a signal station was established on it. There was a reserve line of pits built in the rear. Lay down to sleep. Awakened at 4 o'clock next morning. Marched to the rifle pits and lay down again. The men were still working on the pits. It was very cold and windy.

24. At daylight the pickets began firing to our left and front. It was raining slightly. At 11 a. m. the guns on the knoll began firing. At 8 a. m. there was

cannonading on the right. It sounded as if it came from Lookout Mountain. Ordered to make small fires and make coffee. The line established was about a mile to the front of Fort Wood and as far forward as the rebel's outside line of rifle pits. These were captured, with a number of prisoners. When our pickets advanced the rebels could be seen on the ridge, marching to their left, in column. At 8:45 A. M. the guns in Fort Wood shelled them. At 10 A. M. the rebels shelled our pickets as they were relieving each other. There was more or less cannonading on our right all morning, and from the sound large guns were in action. Occasional cannon firing was heard on our left. At 12 M. the cannonading on our right began very heavy, and rapid musketry was heard also. The fighting continued very hard until about 1 P. M. The yelling of a charge was heard. Smoky and drizzling rain prevented the men from seeing very far. At 3:30 P. M. three guns, about one-half mile on our right, opened a brisk fire on the rebels. Heavy firing continued in the direction of Lookout Mountain, indicating hard fighting. It continued to rain, making it very disagreeable in the fresh dug rifle pits in which the men had to stand. At 4 P. M. the firing in the direction of Lookout seemed to be getting heavier. A staff officer brought the news that General Hooker had captured seven guns and was driving the rebels; also got word that General Sherman had crossed the Tennessee River, and had joined General Howard's lines on the left. Rations were sent to the front at 7 P. M. and issued. At 9 P. M. bivouacked. Too cold to sleep much.

25. Got up early and breakfasted before daylight to be ready to attack if the order came. The 86th Indiana Regiment was ordered to report to Colonel Knefler

to be consolidated with the 79th Regiment, and, under his command, the 86th Indiana was ordered in line on the left, the colors of the two regiments in the center. The 86th Regiment, for the time being, and, in fact, until evening, after the storming of the ridge, was a part of the 79th Indiana, under command of Colonel Knefler. Heard firing at a distance on the left. At 7 A. M. the guns on the knoll to the right began shelling the rebels, who could be seen marching to the left on the ridge. It was reported that the troops of General Hooker were clear up on the side of Lookout Mountain, and had captured a battery of large guns and two thousand prisoners. Light cannonading can be heard some distance on the left occasionally. At 8:45 A. M. the pickets in our front began a brisk firing and kept it up. Could hear firing to the left and front. Soon yelling could be heard, indicating a charge. The cannonading continued on the left. The rebels have been marching to the left for hours. They can be seen from our lines. The guns from the knoll and Fort Wood are shelling them. There was cannonading on the right. It seemed to be on Lookout Mountain or in Chattanooga valley. The sky was clear, except a few thin clouds. The wind was cool. At 9 A. M. the rebels began firing their cannons at our lines in the valley, and soon increased considerably. At 10:30 A. M. our picket line moved forward toward the rebels and brisk skirmishing began along the lines. The cheering was loud and long, on the left, without much musketry, but on the right the musketry was heavy and the yelling loud, and heavy cannonading on both sides. Distant cannonading on the left. The musketry in our immediate front almost ceased at 11:30 A. M. Shells were flying all around, and many fell uncomfortably close to our line. Before 12 A. M. the rebels

had almost ceased cannonading in front—only an occasional shell coming over. The cannonading on the left, at a distance, was incessant and regular. General Baird's Division, 14th Army Corps, in our rear, has been marching to the left for an hour or more to report to General Sherman. At 12 m. there was not a cloud to be seen—the sky was blue and wind brisk from the west. Nearly all our generals are on the knoll to our right. General Grant, General Thomas, General Meigs and others were there. It was the best place to see the army and command its movements. This was Orchard Knob. At 12:45 p. m. the rebels got range on our line of pits and sent a shell parallel with the works, just over our heads, cutting a large limb off a tree; hurting no one. Several others passed uncomfortably close to us. The heavy cannonading on the left indicates, from the sound, that General Sherman is certainly gaining ground on the rebels' right, and it will not be long before we, too, will have to advance on the enemy's works in front. The regiment fell in at 2:30 and formed in "double column at half distance," stacked arms and awaited orders. A steamboat whistle is heard at the landing, indicating that our troops hold Lookout Mountain and the river is open. Heavy musketry is heard far on our left. At 3 p. m. fell in and deployed in line of battle—marched out and formed line outside of the line of rifle pits. At 3:45 p. m. the signal to advance is fired from Orchard Knob. At this signal we advanced at double-quick for a short distance through thickets and bushes. Soon the skirmishers began a brisk firing in our immediate front, and as we emerged from the bushes the regiment was in plain sight of the rebels in their works at the foot of Missionary Ridge. The 79th Regiment advanced rapidly under the enemy's

fire and soon was in possession of the enemy's second line of rifle pits, capturing many prisoners. The rebels fled up the ridge when they saw us coming, abandoning their rifle pits. On the crest of the ridge was a solid line of artillery, belching their deadly missiles as the regiment advanced. On the right and left of the regiment, up and down the valleys, solid lines of Union troops could be seen advancing rapidly toward the ridge, the top of which looked like a solid mass of fire and smoke. Our artillery responded promptly from our rear and kept a continuous fire at the ridge. On the regiment advanced double-quick, and soon had taken the rebels' strong line of works at the foot of the ridge. The line halted a few minutes only. Some of the men were nearly exhausted. Soon Colonel Knefler gave the command "Forward!" and the regiment advanced rapidly for the top of the ridge, yelling and cheering, under a perfect shower of shell, grape and cannister from the rebel artillery on the top of the ridge. There was a high projecting point on the ridge in front of our line and our regiment advanced on the run for that point under a very heavy fire from the batteries of the enemy. They had a cross-fire on the regiment from two points. The ridge in front of the regiment was very steep and rocky with a few scrub oaks growing on its sides. Our regiment was so far in advance of other troops that it was made a target for the batteries, the shells exploding right and left among the men and ploughing up the ground near the line, killing and wounding many of the men, though many shells went over us. The regiment advanced until within a few feet of the main line of works on the crest of the ridge, halted, lay down for a rest, the men being nearly exhausted, but kept up a continuous fire as they lay there. While

in this position, looking to the rear of the line, columns of troops could be seen coming from the right and left to our support. The men of our regiment and the 86th regiment arose and jumped into the rebel works and a hand-to-hand struggle took place. The colors of the 79th Indiana and that of the rebels touched during the struggle, which ended in victory for the Union arms. The rebels fled down the eastern slope of the ridge in disorder. Their own artillery was turned on them and fired at them as they retreated. Some of the men of our regiment were killed on the top of the works on the ridge. On the right and left could be seen Union troops charging to the very mouth of the rebel cannons. They were determined to dislodge the enemy and were successful in driving him from his almost impregnable stronghold. His center having been broken made their task easier in the assault. Our regiment captured many prisoners and flags. Some officers were among the prisoners captured. The 79th captured two pieces of artillery, in addition to the pieces captured on the ridge. These two pieces were being taken to the rear by the rebels; the pieces were 12-pound brass cannons. When the regiment reached the summit of the ridge, brisk musketry was heard to the left about four hundred yards. It soon quieted down. The enemy was driven off the ridge and could be seen running in all directions in disorder. Our troops were in possession of the ridge from one end to the other with all the enemy's artillery and many prisoners. A big smoke could be seen in the distance to the left. The rebels are burning their train on their retreat. The men were ordered to make fire and make coffee. Some of the men went over the battlefield to the starting place of the regiment and wondered how our men had been so successful, taking the roughness

of the ground gone over and the advantage the enemy had of the position into consideration. There was a great number of killed and wounded scattered over the field. The wounded were taken to the field hospital. The regiment bivouacked on top of the ridge. The men enjoyed a most needed rest.

26. Up at 5 A. M. Some of the men went down the ridge on the ground the regiment charged over at double quick. The hill is very steep and is 500 feet high. An occasional cannon shot could be heard on the right and some musketry. The 86th Indiana, which was consolidated with our regiment, had its flag pierced by a shell and eighty-eight balls. Our own flag was badly riddled with shots, but could not count the holes, it having been pierced before. At 9 A. M. a detail of three men from each company was made to go over the battlefield and gather up guns and accoutrements. At 9:45 A. M. cannonading is heard on the left and front, our men are following the retreating rebels. It was a little foggy in the morning, but at 10 A. M. the fog rose and troops could be seen moving about in the valley as far as the eye could reach. Chickamauga Station could be seen and many buildings burning. Our artillery could be seen shelling the retreating rebels. The men could imagine what a grand sight the rebels had of our army maneuvering during the battle. At 11:40 A. M. thirty-six shots were fired from Fort Wood. It is a salute in honor of the victory achieved by Wood's division and the whole army. At 2 P. M. the brigade band was playing on the ridge, and the men cheered. Our wagon trains can be seen going out with rations for the men at Chickamauga Station. At 6 P. M. ordered to lie down and rest. Soon awakened and rations issued. Ordered to be ready to march to camp. The

regiment was soon in line and cheer after cheer went up, and from right to left the whole army was a continuous cheer. Marched toward camp, passing over rebel works. Reached camp at 9 P. M. Built fires and rations were issued. Plenty to eat now. The men retired and enjoyed rest.

27. Up at daylight. Breakfast is eaten. Considerable cannonading is heard in the direction of Ringgold at 9 A. M. Soon ceased. At 1 P. M. orders are received to be ready to march at 6 A. M. to-morrow. At 5 P. M. dress parade an order is read from General Woods, expressing his thanks and gratitude to the troops for gallantry and intrepidity on the 25th, charging and occupying the enemy's works on Missionary Ridge. By its daring act of bravery our regiment had covered itself with glory. It is credited in the official report with being the first regiment to reach the top and plant its banners on Missionary Ridge.

28. Reveille at 4 A. M. Raining. Breakfast before daylight. Orders to carry forty rounds of cartridges. Formed line at 2 P. M. Stack arms, waiting to fall in place in the brigade. At 4 P. Crossed a swamp several hundred yards wide. Timber had been cut to cross on. At 12 M. passed the place where General Sherman crossed the Tennessee river to reach the north end of Missionary Ridge the day before the battle. The bridge upon which he

crossed was still there ; also the rifle pits built after he crossed, and the position from where he charged the rebels. The rebels asked, "What regiment is that down there?" Our men answered, "The 9th Kentucky." "You lie," said the rebs, "the 9th Kentucky is up here." One 9th Kentucky asked the rebs, "Is Bill So-and-so, Jim So-and-so and Dick So-and-so up there?" "Yes," said the rebs. Then they, the rebs, asked about persons they knew also. The two regiments, 9th Kentucky Federal and 9th Confederate, had been raised in the same neighbor-

hood. The conversation was kept up by the two regiments. The 79th Regiment marched back to Tunnel Hill to bivouac. The first time out of range of rebel bullets since the 8th.

At 9 o'clock turned to the left before reaching the gap, passed through the enemy's advanced works and marched to the Knoxville and Dalton railroad, toward Dalton. The enemy had many lines of formidable breastworks on all the hills and knolls everywhere, the ground was very hilly and rough and indicated a hard fought battle. Marks

of shell, solid shot and cannister could be seen all around; the ground in many places plowed up by them, trees ten and twelve inches cut in two, one pine tree twenty-two inches in diameter shot through in three different places. Marched about two miles and reached the main road and railroad crossing and halted. Marched at 3 P. M. through Resaca. Strong fortifications all around. Heavy skirmishing begins on the right and front and the skirmishing on the left continued. Ceased raining at 5:20 P. M. Artillery opened on the rebels. Rebels can be seen passing to the rear occasionally. At 5:30 P. M. the rebel batteries opened to reply on the line in front, killing and wounding some of the troops. Regiment moved off the knoll to allow the artillery to take position there. They opened on the rebels with heavy fire and soon silenced them. There is still heavy firing to the left and front. The batteries ceased firing at dark and regiment was ordered out on the

picket line. Heavy skirmishing continued until after 9 p. m. Marched about eight miles to-day.

18. Picket line relieved at 4 a. m. At 7 a. m. ordered in from the picket line. Marched past strong rebel breastworks toward Adairsville. Halted at 9 a. m. and formed a line of battle. Company "I" is detailed as flanker. Advanced a short distance and halted. There is skirmishing in front. General McPherson's Corps passed in rear to the left. Number of amputated arms and legs lying around unburied indicate the site of an abandoned rebel hospital. Saw quite a number of unburied dead rebels. At 1:15 p. m. marched, 3d Brigade in front. Turned to the right of the railroad, halted and formed in line of battle. Advanced and ordered back. Marched into very thick woods. Hard marching. woods, and halted. Ordered back a short distance and stacked arms. At 5 p. m. moved forward again. Brisk skirmishing in front. At 5:45 p. m. the artillery opened on the rebels by volleys. The earth fairly trembled. Advanced in line through the fields to a strip of woods. Skirmishers soon began hot firing. Artillery soon came up and took another position. Darkness prevented further action for the night. The right of the 3d Brigade joined the 14th Corps. The 17th Kentucky deployed to the front as skirmishers. a very poor country. Marched in the rear of two batteries and could not march fast. At 4:45 p. m. heavy cannonading in front, and at 6 p. m. considerable musketry. Reached Punkin Vine creek at dark; crossed on a bridge. At 7 p. m. it began raining very hard. Marched on about three miles. Met the wounded of General Hooker's corps going to the rear. Marched 6 a. m. about one and one-half miles, and formed in line of battle on the left of the skirmish line. At 7 a. m., as soon as the skirmishers advanced, they were fired upon by the rebels in a very thick wood and in matted underbrush. The rebels fired heavily, and brisk skirmishing was kept up until 11 a. m. The artillery opened fire on the rebels; advanced but a short distance to give the right and left time to complete the alignment. At 3:40 p. m. the rebel batteries began shelling our men, and the shells burst all around us. They were soon silenced. At 7 p. m. marched back a short distance and bivouacked for the night. Marched about three miles during the day. Three days' rations issued for five days. Shoes and socks issued.

27. Reveille 3:30 a. m. Two days' rations of beef issued. At 5:20 a. m. artillery opened on the enemy in front, and soon the whole line was engaged, rebel shells exploding all around; 9:45 a. m. marched to the left, Colonel Knefler commanding 3d Brigade, Major Parker commanding regiment. The 3d Division formed in six lines preparatory to an attack upon the

enemy. For a mile the march was nearly due southward, through dense forests and the thickest jungles, over a country scarred by deep ravines and intersected by difficult ridges. Added to these difficulties, the hot rays of a tropical sun made it almost impossible to advance under such adverse circumstances. Moved a mile southward, then about a mile and a half to the west. 4:45 p. m. there was brisk skirmishing and some cannonading to the right and front. At 5 p. m., while the regiment was in line preparatory to the charge about to be made, a man of Company "A" was killed in his place in line by a rifle ball. Several others were wounded. The command "Forward!" was given, and the regiment advanced rapidly under a heavy fire of grape and cannister from the rebel batteries posted on the hills in front; advanced about one-fourth of a mile and found that the Federal troops who had occupied the front line had been forced to fall back, being out of ammunition. The 79th Indiana was the front line at the edge of a field sloping down to a rail fence at the edge of the woods. Under the heavy fire from the enemy the men of the 79th Indiana picked up the rails, and, advancing to the brow of the hill, made a temporary line of field works to protect them from the enfilading fire of the enemy. The regiment lay behind the rails and kept up a continuous fire at the rebels, and thus kept them in check until after dark, when a continuous flash of their guns could be seen not more than two hundred yards distant. At 10 p. m., being almost out of ammunition, the regiment was ordered to fall back quietly and in order, which was done under a heavy fire from the enemy. The rebels advanced their line in the darkness, and their bugle sounded the charge. The regiment fell back about half a mile, where a brigade of regulars had built a very strong line of

fortifications, expecting the rebels to follow and attack. Marched to Picket's saw-mill under heavy fire of artillery; thence marched to the left in the woods a short distance; put up a temporary line of works of stones, stumps, etc. At 1 A. M. lay down to sleep, very much fatigued from the day's work. Marched about eight miles. The regiment lost severely in killed and wounded.

28. Awakened 4 A. M. by rebel shells exploding uncomfortably close. Ammunition issued. Ordered to build a line of works at once. The men have had nothing to eat since yesterday A. M. and are not allowed to build fires. Brisk firing in front and left and sounds nearer and nearer. Skirmishing and cannonading all along the lines. At 2 P. M. ordered to move back, change front and build strong works. Skirmishing was not so brisk. 5 P. M. artillery began shelling the rebels on the left and front. Two days' ration of beef issued. Ordered to have reveille at 3 A. M.

29. Sunday. A brisk firing on the skirmish line during the night. General alarm along the lines. Formed in line. Rested again until 3 A. M., when firing began again. Fell in and managed to eat breakfast during the excitement. There was brisk skirmishing all along the line. It is comparatively quiet in front of the 3d Brigade. Only an occasional shot is heard. At 2 P. M. the rebels shelled the Union lines, the shells exploding uncomfortably close. The regiment ordered on picket at 5 P. M. Was quiet until sometime after darkness set in when brisk firing began along the lines and in front. Skirmishing did not cease during the night.

30. On picket. Awakened at 3:30 A. M. by heavy cannonading on the right and left. Pioneers were at work on the left all night. It was a cool night. Re-

ceived orders, that if attacked to hold ground, as reinforcements would be pushed forward immediately. Relieved from outpost duty at 7 P. M. Marched to bivouac. Three days' rations issued. Ordered to be ready to march at 9 A. M. Marched forward toward the picket line through very heavy woods, to take place in line with the brigade. Lost the way in the darkness. Did not find proper position until after midnight. Built some strong barricades and lay down to rest behind them.

31. Considerable skirmishing all night. At 8 A. M. ordered to move, not being in the right place in line. Just formed our new line when the rebels charged the picket line, without any serious result. Men were reinforced by a regiment, repulsing the rebels. Worked very hard on the breastworks, gathering logs, rocks and rails to make them as strong as possible. Could not work steadily, having to form line whenever heavy musketry firing was heard. Worked between volleys and by 10:30 A. M. the line was good and strong. The lines were strong and secure against any attack the enemy might make. Very hot day. The men very much fatigued, having lost much sleep and having worked so hard. The rebel skirmishers sent bullets over the works all day. Some beef was issued and the regiment lay down to take much needed rest. Awakened during the night by brisk firing in front. Skirmishing did not cease all night.

The rebels continued shelling the lines and our men advanced the skirmish line. The firing along the line very hot. At 8:15 P. M. we moved out and built a line of field works and lay down to rest. At 11 P. M. aroused by brisk skirmishing. It proved a false alarm and lay down again.

22. Up at daylight. Ordered to be ready to march at 6 a. m. Skirmishing. Still brisk cannonading on the right. At 9 a. m. the rebel artillery on Pine Tar Mountain opened fire upon the line, in position in an open field. At 12 m. ordered to march. At 2 p. m. brisk firing on the left and front. At 4 p. m. ordered to fortify. At 5 p. m. skirmishers are advanced and brisk skirmishing is kept up. Several of the skirmishers are brought to the rear wounded. The rebels opened

on our artillery and the shells and shot passed over us and frequently struck in the works. Everything in readiness for advance of the enemy as their artillery ceased firing suddenly. Two companies ordered to reinforce the picket line of the brigade. The skirmishers advanced close to the rebel works, but had to fall back on account of a heavy cross-fire from the rebel lines. Several killed and many wounded out of the brigade. Reinforcements are marching to the right to the relief of the 20th Corps. Rations issued and bivouacked.

23. Aroused at 3:15 A. M. Ordered to be ready to go on skirmish line at 4 A. M. Relieved the 19th Ohio Volunteer Infantry. Two companies going on the outpost line, the rest of the regiment in reserve. The balls are passing over thick and fast. There is a battery in the rear in support. Clear day. Considerable cannonading on the left. The skirmish line was reinforced at 11 A. M. The rebels fired at the skirmishers from behind their works and have a cross-fire. The only shelter is such trees and thick bushes as the men get behind. The rebels began cannonading from the top of Kenesaw. At 3 P. M. the regiment deployed and came out on the skirmish line within two hundred yards of the main line of the rebel works and advanced, rifle pits covering approach all along the front. At 4 P. M. a signal cannon shot fired in the rear. At the same time heavy cannonading is going on from the top of Kenesaw. Our men are charging along the mountain. The artillery in the rear fired a certain number of times and the artillery all along the line opened on the enemy. The solid shot and shells passed over the regiment from all directions, cutting off limbs and large branches of trees. Then the artillery ceased firing and the line ordered "forward," and,

yelling, started forward charging the enemy's advanced works, going from tree to tree, firing rapidly. The right drove the rebels out of their rifle pits into their main line. Then the rebels charged our men in strong force and drove them back a little distance, firing volley after volley, as the skirmish line retreated, dodging behind trees, falling back in fair order. The rebels followed as far as they could, nearly in the rear and right. The left was compelled to fall back also. Exposed to a cross-fire, our men on the left of our regiment could see the rebs trying to get around to flank us. The left poured a volley into them checking their advance some. We were out of ammunition. The major, the commissioned officers and the color-bearer kept the regiment supplied. The guns, after the rapid firing, became so hot that they could hardly be handled, and the barrels expanded so that the cartridge slipped down the barrel without ramming. Some of the men fired two hundred or more rounds of ammunition during the day and were nearly exhausted with the toilsome struggle. The heavy cannonading almost ceased at sundown, only an occasional shot being heard. Heavy musketry on the right and left continued until 8 p. m. when the regiment was relieved by the 9th Kentucky. The loss of the regiment was four killed and seventeen wounded. Marched back to the works and bivouacked. The skirmishers kept up light firing during the night.

25. Aroused at daylight. Little skirmishing in front and along the line. Ordered to pitch tents and to police quarters. Clear and very hot. At 10 a. m.

brisk cannonading by the enemy on Kenesaw. Our batteries replied strongly. At 4 p. m. the artillery exploded a caisson on top of Kenesaw. The explosion was caused by one of the shells fired by the Union batteries. Beef issued. Balls are passing over the Union lines very fast. It is not safe to be away from the breastworks.

26. Sunday. Aroused at daylight. Warm and clear. Drew clothing. At 12 m. a battery to the left opened on the enemy, which was replied to very promptly. The cannonading lasted for some time. Heavy cannonading some distance on the right. The 11th Indiana Battery took position to the right and front. Pioneers having built a small epaulment for it, the 11th Indiana Battery armed the epaulment with four twenty-pound Parrotts and two twenty-four-pound Howitzers. Entanglements have been placed in front of the work.

27. Aroused at daylight. Ordered to pack up everything, but not strike tents, and be ready to move. The battery on the left opened on the rebels, and they replied promptly. Marched at 7:30 a. m. to the right. The whole line is moving to the right. The cannonading to the left was very heavy. At 9:15 a. m. Union troops began advancing all along the line. Brisk firing. The whole division in reserve, ordered to lie down under shelter of rise in front, and wounded men rapidly coming to the rear. At 10 a. m. balls passed over us as we lay waiting for orders. Cheering is heard in front, with brisk musketry. The division ordered to advance a short distance and support General Newton's 2d Division. Wounded men increasing on the firing line, coming to the rear. At 10:45 a. m. ordered back a short distance, and brisk musketry on the left. Heavy cannonading on both

sides all along the lines. At 11:30 A. M. the whole division ordered back to quarters. Very hot day. Three days' rations issued in the evening.

29. Awakened at 3:30 A. M. Ordered on picket or skirmish line. The regiment has but 190 men for duty, a great many being sick from the constant exposure and severe hardships of the last few days of the campaign, and ordered to the hospital. Marched on picket at 7 P. M. But little firing is done by the pickets. At 2 A. M. very brisk firing is heard by volleys on the right, and expecting an attack in front. Men are cautioned to keep cool, and reserve their fire until the enemy come close within short range. The firing on the right is very heavy, a perfect roar, and continued for some time. Relieved at daybreak, having been in the rifle pits all night without sleep, and on the alert all of the time.

30. The regiment was allowed to rest and sleep in the rear of the reserve. The men are talking with the rebels, and permitted trading coffee for tobacco; the rebels having a large supply of tobacco, are very willing to exchange. The division sent a detail under a flag of truce to bury the dead killed on the 23d. It rained to-day. Some rations issued.

These bodies were in a bad state of decomposition; the smell was horrible. The dead bodies of a few Union soldiers were also unburied and badly decomposed. Ordered to be ready to march. At 7 a. m. ordered to put up works in front. Constant cannonading is heard on the right some distance. A hot day. At 10 a. m. marched in the rear of the 2d Division. The hottest and hardest marching of the campaign—to march fast with the heavy loads and very little sleep the night before. The whole army had moved to the right. Halted at noon an hour for dinner. It rained. Marched about ten miles to the right. Marched through many lines of entrench-

ments. Halted at 4:30 to bivouac in the rear of the 23d Army Corps.

27. Reveille at the usual hour. Raining very hard. Troops and teams have been passing for some time. Ordered to get ready to march at 8 A. M. Marched back a short distance, then marched out on the Sandtown road. Very warm day and muddy. Skirmishing on the left at 11 A. M. and halted. Cavalry to the left and front and two pieces of artillery in rear of the regiment. Moved further to the right and fronted, and took position on a hill on the right at 12 M., having marched five miles. Ordered to build line of works in a hurry. The rebels can be seen moving in front. Skirmishing and cannonading heard on the left. The works ordered were soon built. At 5 P. M. ordered on a reconnoissance. Marched to the front. The 79th regiment and 9th Kentucky in line with skirmishers in front. Advance nearly a mile and not a shot was fired in front, which was disappointing to us, as the enemy had left. Relieved by the 2d Division of the 4th Corps, and returned to the works at 8 P. M. A few shots on the left are heard.

28. Sunday. Reveille 4 A. M. Clear and a little cooler. Ordered to move at 7 A. M. Skirmishing and cannonading to the left. Waiting for orders. Marched at 6 P. M. back about a mile and halted until the train moved out, the brigade in rear of the corps, guarding the train. Started at 8 P. M. Marched over hills and hollows and muddy branches, halting every few steps. Came up with the 3d Brigade at 12 midnight. Marched about three miles.

29. Up at sunrise. Clear. Marched at 7 A. M. a short distance, and rations were issued in haste. Ordered to leave everything except gun and accoutrements and rubber blanket, and marched at 9 A. M.

Reached the Montgomery railroad. Troops tearing it up, burning ties and bending rails. Followed the railroad toward the junction of the Macon and Montgomery railroad at East Point. Brisk skirmishing in front. Halted at 12 m. Began to destroy the railroad by raising the track bodily and turning it over; loosen the ties from the rail and set them on fire to heat the rails and bend them around trees and telegraph poles. At 1 p. m. marched back to camp. Went in line in rear of the front line and halted in the woods at 3 p. m. Marched about five miles.

30. Up early and ordered to get breakfast ready to move. Marched at 7 a. m. Halted a short time to let other troops pass. At 8 a. m. marched out on the road to the Montgomery railroad, and turned toward East Point, marching but a little distance at a time. At 10 a. m. heard cannonading a considerable distance off to the right and front, 3d Brigade on the extreme left. Halted at 3:30 p. m., and formed in line of battle, having marched five miles. At 4:30 p. m. marched again, and marched to the right a mile. Formed line at 5:30 p. m., and halted for the night. Took position on a knoll. The rebels are reported to be advancing on the left flank. The bugle sounded at 7 p. m. Advanced to the front. Took position on a ridge and built a line of works. Bivouacked for the night. Sergeant John W. Gosney, of "F" company, mustered as first lieutenant of "E" company.

31. Reveille 3:30 a. m. Ordered to eat breakfast at once. Rebel cars and wagon trains can be heard moving, and rebel columns can be seen from the tops of trees. Skirmishing in front. At 7 a. m. the artillery began shelling the rebel trains on the right. Strengthened line of works and moved to the front a short distance. Formed in line of battle and built

another line of field works. The enemy can be seen running across an open field in front, the skirmishers driving them. The regiment was ordered on the skirmish line. The skirmishers advanced without firing very much, and soon reached the rebel line of works just abandoned. Halted at a mill for dinner. Started the mill and ground corn and wheat. Marched at 2 P. M. Heard brisk skirmishing and the locomotive whistles. The regiment had advanced a good distance deployed as skirmishers. Relieved and came back to the road. Moved on slowly, and at 4:45 P. M. the battery to the left fired several shots. Very brisk skirmishing began, and continued until the Macon railroad was reached. Halted at 5 P. M., having come about three miles. Some of the men were tearing up the railroad. Moved around and formed line. Put up a line of works, with wire stretched in front to trip the rebels should they attempt to attack. Ordered to lie with guns by the men's sides, ready to get up at a moment's notice, as an attack is expected.

SEPTEMBER, 1864.

1. Reveille 4 A. M. The 1st Division and pioneers are passing to tear up the railroad. Cannonading on the right all night, several miles off. After 3 A. M. it was very heavy, from the sound. They are using large guns. Strengthened the works; the cannonading on the right ceased at 7 A. M.; ordered to stop working on the works and get ready to march immediately. Marched at 8:30 A. M. to the right. Company "I" detailed as flankers. Marched about two miles and halted near the 14th Corps. Marched again in the direction of the cannonading; halted at 12 M. Skirmishing and cannonading on the left and front and some on the right not far off. Ordered to make coffee.

At 1:30 P. M. heavy skirmishing and cannonading is heard on the line in front. Marched toward the Macon railroad; it is torn up and burning. March down the railroad to the right and turned the railroad upside down; loosed the ties from the rails and built cribs, burning the ties; heated the rails red-hot and twisted them in all kinds of shapes around trees and telegraph poles. Cannonading on the right at times very heavy. At 5 P. M. marched again. Heavy musketry and artillery is heard in front; hard fighting is in progress, judging from the cheers and yelling. At 6 P. M. we heard a great cheering and yelling at a distance. The firing ceased at sundown. Halted and stacked arms. Skirmishing begins again further off. At 6 P. M. very heavy firing began again, accompanied by artillery in the front and on the right. Shells and shots came right over the brigade. At 6:15 P. M. brisk skirmishing began on the left and front; the batteries opened on the rebels and other batteries are taking position. At 6:40 P. M. very heavy firing and yelling are heard and growing brisker. At 7 P. M. marched to the front and left, marching about six miles; halted in the rear of other troops and ate supper and were ordered to lie down and rest. Soon awakened and ordered to be ready to march in one-half hour. Soon ready, awaiting orders. After waiting some time the order to march is countermanded. Again lay down. About 11 P. M. the troops are awakened by a distant roaring and explosions, apparently in the direction of Atlanta. Great light was seen in the direction of the explosions; the heavens were all red from the flames; it was terrible and lasted a long time. Ordered to be ready to march in case of emergency. After 2 A. M. the noises and disturbances ceased, and ordered to lie down again.

2. Awakened at 3:30 A. M. by heavy skirmishing

in front. Marched to the left to picket on the flank. It rained. At daylight pickets and skirmishers commenced yelling and firing. The artillery opened on the rebels in front of the brigade. Heard the whistle of a locomotive and the continuous rumbling of large trains. The pickets that went out in the morning found themselves very near the enemy. Captain Dunbar, in posting the pickets, went too far to the front and was taken prisoner, and Captain Ritter was again ordered to take command of the regiment. Ordered to march to the rear a short distance. Rations issued and ate breakfast. The news circulated that the heavy cannonading of last night was caused by the rebels blowing up their ammunition trains which could not be saved, and burning the buildings and contents containing stores and ammunition before evacuating Atlanta. Marched again at 9 A. M. Captain Ritter placed in command of the regiment. Marched through a line of rebel works along the railroad, where the battle was fought yesterday. Several dead rebels are lying on the ground unburied. Arrived in front of Jonesboro and halted for rest. Marched in town at 10 A. M. Cannonading in front, and some in the direction of Atlanta. Very hot and dusty. Halted at 12 M. to eat a bite, and marched again at 1 P. M. Brisk skirmishing in front. A whistle from a locomotive is heard. The artillery pushed to the front, and soon opened on the rebels. Marched slowly on the railroad. Turned to the left in a field. The enemy was in view and opened heavy fire from a battery up the railroad track. A piece of shell struck Adjutant Dunn in the head, killing him instantly. At 3 P. M. formed line of battle some distance to the left of the railroad. Brisk cannonading at times. Marched further to the left and stacked arms. At 4:30 P. M.

a heavy skirmishing line was ordered to the front. The line advanced and the regiment followed in column of divisions, halting occasionally. Advanced thus about a mile. Then our skirmishers began a brisk firing. The column was deployed and changed front parallel to the skirmishers. Halted where the rebels had cut down the trees and bushes to impede our advance. Captain Miller, of General Knefler's staff, was killed here, and Lieutenant Colclazier was wounded by the same ball. Colonel Knefler's narrow escape. At 5:50 P. M. ordered to advance and charge the rebel works. Started with a yell, going hop, step and jump over the cut trees and bushes. Captured their skirmish pits, with some prisoners, and reached the edge of a corn field. The lines were dressed. The rebels' strong works, with head logs, just in our front about two hundred yards, could be seen. Captain Ritter, commanding the regiment, gave the command "Forward!" and the regiment advanced with a yell through the corn field, in full view of the rebels. Reached a small ridge in front of the rebel works a short distance, and the rebels fired a volley at the regiment. Their artillery shelled also. Lay down just this side of the ridge. Some of our men advanced to within a few yards of the rebel works. The regiment fired several times. The rebels kept up their deadly fire on the regiment, and our right gave back, and as our line had advanced nearer the works than any troops, could not hold our place. The regiment retreated. It fell back to the woods and put up a line of works. The mystery is that so few were hurt. It is thought the ridge protected the line from the rebels' fire. They overfired. Some of the men did not get back until after dark. Our loss was slight, considering the place we charged. Three severely wounded

was our loss. General Wood, commanding division, was wounded in the foot, and General Knefler assumed command of the division. Colonel Stout, of the 17th Kentucky, in command of the brigade when the line of works was completed, lay down with accoutrements on to be ready in the event an attack is made by the rebs during the night. Marched and fought eight miles to-day. Colonel C. D. Bailey, of the 9th Kentucky, and Charles F. Manderson, of the 19th Ohio Volunteer Infantry, were seriously wounded.

3. Awakened at 3 A. M. The rebels are firing very low at our works. Strengthened them some for better protection. Raining hard. Brisk skirmishing kept up in the front. The rebels had slipped up close to our works during the night. At 7:30 A. M. the rebels began shelling. Some of the rebel balls passed under the head log, demonstrating by close practice that they had a good range. The works were made nearly shell-proof by noon. Rained hard and put up tents. Other batteries to the left opened on the enemy. At 1 P. M. the rebels are in plain sight very near to the line, and are busily working on their works. At 3:30 P. M. the artillery on the right opened on the rebels, and kept up a brisk cannonading until night. Rations of beef issued. The pickets were ordered not to fire unless the rebs advanced. The rebels kept up a continuous fire all night, firing very low. It is raining. Sergeant-Major Munhall appointed adjutant, vice Dunn, killed in action.

4. Sunday. Up at daylight. The position is very dangerous. Men are wounded behind the works. It is not safe to move around. The rebels fire into the tents. It is the opinion that the rebels have sharpshooters out. They are not more than 150 yards from the line. The artillery on the right keeps up a con-

tinuous fire on the enemy, occasionally firing canister. The rebels kept up a brisk firing, firing shells and kept yelling. It is believed they will attack in the night. Drew extra ammunition and are prepared. Received orders that in the event of an attack every man must be in his place in the breastworks without word of command or bugle signal.

5. Awakened at 3:30 A. M. The artillery is firing continuously on the enemy in the immediate front. Very hot. Every man is ordered to have sixty rounds on his person. Work has been stopped on the breastworks. Three days' rations issued. The rebels fired a few shells into the camp. Ordered to be ready to march at 8 P. M. Raining. Marched 8:30 P. M. with as little noise as possible, Lieutenant Burns acting adjutant. Marched through the woods. Mud ankle deep. Very dark. Marched through Jonesboro and halted at 5 A. M., having marched about eight miles of the worst marching ever known.

6. Lay down to sleep at 5:30 A. M. Awakened at 9:30 A. M. and ready to move at 11 A. M. Can hear some cannonading in our rear. The rebels may be following us up. Six thousand bales of cotton are burning along the railroad track. Formed in line and put up field works. Skirmishing and cannonading is heard. Ordered to be ready to march at daylight tomorrow. Raining hard. Bivouacked for the night.

7. Reville 3 A. M. Marched at 6:30 A. M. to the railroad. Marched fast. Turned to the right of the railroad at 10 A. M. Halted at 12 M. and formed line of battle and bivouacked, having marched about ten miles. Position seven miles from Atlanta. Counted off in platoons of fourteen men front, and ordered to pass in reviewing order in a soldierly manner. Marched through Atlanta, the regiment in front of the division and the brigade band in front of the regiment. Saw where the rebels had burned cars loaded with ammunition, which made the light and the noise on the night of the 1st. It was a great sight to see. Passed through the rebel line of works at 1:30 P. M. and passed where General McPherson was killed on the left on the 22d of July. Halted. Formed in line at 2:30 P. M. Marched at 4:30 P. M. to Pulaski, and out on the Nashville pike, 3d Brigade in the rear. Rear guard did not leave town until fire was opened on the rebels. Marched very slowly. Passed crowds of negroes in large numbers. At 1:45 A. M. halted and bivouacked in the woods by the roadside, having marched twelve miles. The place of the bivouac is a graveyard. Prepared to lie down between the graves, but the bugle sounded the reveille and assembled again, the enemy's cavalry hovering around in large numbers to attack the wagon trains. General alarm along the lines.

24. Marched at 4:30 A. M., very fast. Halted for rest at 9 A. M. Cannonading in the distance to the front. At 11:30 ordered into position on the left flank. The regiment was not all present, many having fallen out from the hard marching. Those present marched into a corn field one hundred yards from the pike, and deployed, and advanced firing on the rebel cavalry dismounted and deployed, fighting as infantry, the horses in rear of them. Enemy retreated to the woods. Skirmished with them until relieved, and joined the whole regiment, all now together. Ate dinner. Cannonading is still heard to the left of the pike. Teams are passing very fast. At 3:30 P. M.

At 10 A. M. Fred. Barton, of Company "A," was wounded in the side. Cannonading ceased. Only an occasional shot is heard. It rained all day. Frank Jelleff, sutler, came up to the regiment after dark. Ordered to get ready to march. Did not march.

27. Up at 4 A. M. Scattering shots heard all night. The artillery pulled away from the line. At 9 A. M. a few cannon shots on the right. Relieved from picket at 7 A. M. Ordered to be ready to march at a moment's notice. At 4 P. M. it is reported that the rebels are advancing. At 6 P. M. marched quietly to town. Company "C" remains in the works waiting for the pickets to be relieved and covered the retreat. Marched through town and about three miles. Crossed Duck river on a pontoon bridge, near the railroad bridge.

Halted in the woods at 9 : 30 P. M. to bivouac, having marched about six miles.

28. Before 5 A. M. aroused by what appeared like heavy fighting across the river. Company "C" came up and reported that the heavy firing was the blowing up of the fort across the river. At 7 : 20 P. M. marched across Rutherford creek on the railroad bridge. There were several lines of battle in front, and heavy skirmishing was kept up. Reached the Nashville pike. A wagon train is blockading the road. Marched to the left of the whole line, fronting Columbia, forming line at 10 A. M., having marched six miles. Ordered to put up a line of works. Skirmishing in front. In position about one hundred yards from the river and the town plainly to be seen. At 11 A. M. moved a short distance and began on field works again. At this time the enemy opened fire very briskly. The Union batteries soon silenced them for a time. Reinforcements came to the brigade by addition of a Missouri regiment, eight hundred strong. The railroad bridge and pontoon bridge were destroyed before day-break. Rations are issued, and bivouacked.

29. Reveille 4 A. M. Light skirmishing kept up all night. At 8 : 30 A. M. the general sounded. Troops are marching from the right toward the pike. At 9 : 35 A. M. the enemy opened fire with eight guns. The Union artillery promptly responded, and there was a duel which lasted some time, and finally the rebels ceased firing. At 10 : 30 A. M. the regiment deployed along the line of works, and the 3d Brigade marched to the rear. At 11 : 30 A. M. the rebels began firing again. The artillery answered very promptly. Brisk skirmishing in front and on the left. Ordered to carry sixty rounds of ammunition. The rebels attempted to drive the Union troops from the ford, but

did not succeed. At 4:10 p. m. the rebels are attacking, charging the lines in force. They again failed. Brisk firing was kept up until dark. At 5:15 p. m. marched to the pike, the 23d Corps also marching out. At 8 p. m. marched about two miles, very slowly. Roads very muddy. Crossed a creek at 11 p. m., and marched very fast. After midnight ordered to be very still and march very quietly. Marched in front of a rebel line of battle more than two miles long and only one-half mile from the pike. The column soon came in sight of a long line of camp fires to the right, and not more than one-half mile distant. A line of battle was seen advancing toward the pike. At first it was believed to be a rebel line of battle advancing, and the men began to be nervous, preparing to defend themselves. Soon the happy discovery was made that the advancing line of battle was a part of the 2d Division, placed there to protect the flank of the column between the pike and the rebel line of battle. Marched into Spring Hill, a small town on the pike, without further obstruction. Halted on the other side of town, facing to the northeast. At 3 a. m. marched about ten miles. Bivouacked in line of battle on arms in close proximity to the enemy.

30. Awakened after having slept one-half hour. Skirmishing heard to the right. Marched at 5:45 a. m. on the pike toward Franklin. There were three columns of troops marching side by side on the pike. The rebels are gone from the pike; some cannonading in front. Came to a place where the rebels had destroyed thirty or forty of our wagons the day before; they were still burning. Arrived within a mile of Franklin; halted at 9:15 a. m., having marched about eleven miles, resting but once. At 10:25 a. m. the artillery in rear opened on the rebels who were follow-

ing very closely. At 10:45 marched into Franklin. The troops were strongly entrenched; marched through the town, crossed the river and formed in line of battle, having marched about fifteen miles. Rations of beef issued. Ordered to be ready to move. Heavy cannonading and fighting to the left. Heavy cannonading all along the line. Shells could be seen exploding all along the line. At 4:30 P. M. moved to the left a mile to Fort Granger in reserve. Charge after charge is being made in front; the rebels are fighting hard, as little time elapses between the cheering. The flash of the guns could be seen from Fort Granger, where the brigade was in line. The fighting continued until 9 P. M., after the regiment had built a line of works. At 10 P. M. moved again to the fort on the bank of the creek near the railroad bridge. The troops in front abandoning the front line began crossing the river in retreat to Nashville. The brigade is ordered to hold the fort until the troops have all crossed. Bivouacked in line, expecting attack.

DECEMBER, 1864.

1. As soon as the troops retiring from the front crossed the river the railroad bridge was set on fire and is burning. At 3 A. M. marched, evacuating the fort. The cavalry deployed on the banks of the river. The rebels in pursuit appeared and began skirmishing. Their artillery soon came up and began shelling. The cavalry and artillery, in position on the north bank of the Harpeth river, responded vigorously. Cannonading very brisk for a half hour, when the position in and about Franklin was entirely abandoned. Marched about ten miles, halted and allowed to cook. Marched at 10:15 A. M. of Nashville and formed line of battle at 12 M., having marched about sixteen miles. Troops very tired and footsore. Three days' rations issued. Marched again at 2:25 P. M. 3. Reveille 4 A. M. Ordered to stand in line of battle at 5 A. M. At 8 A. M. moved a short distance and built a line of works of stone and dirt. Skirmishing in front. Three days' rations issued. At 2:15 P. M. the rebels began advancing along the front, taking position. Brisk skirmishing. The rebel line so close that rifle balls fall around. At 3 P. M. the artillery right and left opened on the rebels. Cannonading heard far into the night. On some parts of the line the rebels drove in the advance skirmish line and halted. Built two lines of brush entanglements in front of the works. Pitched tents. Cannonading ceased in front at dark. Firing of heavy guns in the forts on the right during the night.

4. Reveille 4 A. M. Stood in line of battle. The rebels built a line of works during the night where they halted the evening before, and their musket balls fall into camp continuously. The batteries along the lines began brisk shelling of the rebel works. The rebels did not fire artillery. Every one worked on the breast-

works. Drew clothing, and some sanitary goods are issued.

5. Reveille 4 A. M. Stood in line of battle. Very cold and frosty. Skirmishing all night. At 8 A. M. the artillery opened on the rebels and continued regular fire. The rebels do not reply.

8. Reveille 4 A. M. Stood in line of battle. Cold and windy; the ground frozen hard. Some skirmishing on the extreme left. The rebels charged the skirmishers of the 1st Division and drove them in. The artillery opened on them, and the rebels were driven back. Captain Ellis and Frank Jelleff brought up some sutler goods and put up a tent.

9. Reveille 4 A. M. Stood in line of battle. Sleet and hail fell to a depth of several inches. Cold and disagreeable. Three days' rations and some whisky issued. Skirmishing all day all along the lines.

BATTLE OF NASHVILLE.

15. Reveille 3 A. M. Ready to march at 4 A. M. Four men from each company detailed for picket. Struck tents before daylight. It is very foggy. After 8 A. M. troops are moving and massing on the right. The 13th Ohio deployed in the brigade line of works. Brisk cannonading on the left. Garrison of Nashville making a demonstration on the left to attract the attention of the enemy while the right is taking position to attack. Heavy firing of artillery and gunboats on the right, where Wilson's cavalry is attacking the enemy's left. The 79th Indiana regiment moved a short distance to the right and massed behind a hill. Brisk skirmishing kept up all the time. At 11 A. M. very brisk skirmishing began in front. Yelling by the advancing skirmish line. The 4th Corps lines ordered to advance. The troops loaded their guns and advanced. At 12 M. the regiment formed behind our works and moved over them in a thick bushy place. The bushes had been cut down. The front line advanced. The Seventy-ninth moved to the left, nearly in front of the works we vacated in the early morning. The 1st Brigade of the 3d Division is in the front line charging the enemy's line of works. Rapid musketry and artillery firing. The 1st Brigade

carried the enemy's first line of works. The Seventy-ninth again moved to the left, and is on the extreme left flank. Advanced to the first line of enemy's works. Many wounded men are being carried to the rear. Third Brigade ordered to form on the rebel line of works, which faced our old line of works, vacated in the early morning, to hold the left flank. The Seventy-ninth was fortunate in being assigned to a position behind a stone fence, serving as breastworks, and made good protection. The men on the right and left of the 79th Indiana put up a temporary line of field works under a heavy fire from the enemy. Artillery kept up a continuous fire on the enemy. The latter were not firing much with artillery in our immediate front. At 1 p. m. it began raining very hard. Cannonading and musketry is heard on the right. Charge after charge is being made by the Union troops. Firing sounds nearer and nearer, indicating that the federal troops are successful and are driving the rebels. At 4 p. m. the right of the Union army is advancing and driving the enemy. A general charge on the rebel lines is ordered, and, after a severe fight, in which the Seventy-ninth takes part, the enemy takes flight and the works are in possession of the Union troops. The enemy is in full retreat and running in every direction. The Union troops are yelling for joy. The right is continuing its good work, and is advancing, following the retreating rebels. At dark the left of the army, where the Seventy-ninth is, advanced some distance to be in line. Moved about a mile to the front and right. Then to the left to the Granny White pike. Then to the right and formed in line with the other troops. Bivouacked for the night. At 8 p. m. the 1st Brigade captured a battery of four

guns. A detail for picket was made from the regiment. Rained in the night.

16. Reveille 4 A. M. From all appearances the rebels are all gone. Some of troops are taking position. The bugle sounded "Attention" at 7 A. M. Skirmishing in front on the pike. The regiment marched to the left. Brisk firing of musketry and artillery on the right. Crossed the Franklin pike and the railroad. Saw the rebel works captured by the 1st Brigade of 3d Division, the day before. Lines of sharp stakes driven in the ground with a wide line of brush entanglement in their front. Marched toward Franklin. Recrossed the railroad. The rebel artillery opened on our line. Halted. 8 A. M. marched to the left and to the right to get in place in the line, the 3d Brigade was the left of the Union Army, except General Steadman division, one brigade white and one brigade of colored troops. Halted at 10:30 A. M. The line completely formed. Terrible fighting on the right. Moved a short distance to the right, to support that part of the line. Desperate fighting still continues on the right. Artillery is firing rapidly. 11 A. M. very heavy musketry is heard all along the lines, greater than ever. Then for a moment all was still. The firing began again more vigorously than before. The rebel artillery fired shells at our line with great accuracy, exploding among the men. The 3d Brigade held its position on the left. 2:30 P. M. the 1st and 2d Brigade of the 3d Division, 4th Corps, were massed and moved forward. The 1st Brigade deployed and charged the hill, the 2d and 3d in support. The hill was taken and the line established. The 79th Indiana was ordered to support the 6th Ohio Battery, to hold it at all hazard, if the troops in front were repulsed. The colored and white troops in front and left charged

the rebel line of works on the Franklin pike and were repulsed. The rebel artillery belched forth grape and cannister and the musketry was very heavy. 4 P.M. heavy fighting was renewed on the right. Seemed to be nearer and nearer. It sounded as if the whole line were advancing toward our line. The 79th Indiana, in support of the battery, had built a temporary line of field works. The rebel works could be seen in the distance as the fighting on the right became nearer. Our brigade was ordered forward to assault the rebel works. The regiment, with fixed bayonets, started at double-quick with a yell. As the regiment neared the works the enemy vacated their works and ran to the rear pell-mell, the regiment firing at them as they ran. This line of works was very strong and had a line of brush entanglements in front. There were many black and white soldiers killed near these rebel works. The rebels left a battery of four guns. Knapsacks, haversacks, broken guns, etc., scattered around. The rebels had been routed from their works all along the whole line, and they could be seen falling back very badly scattered and in disorder. The regiment moved forward several miles, until after dark and halted. The retreating rebel artillery fired an occasional shot without doing any damage. The 79th was ordered to the rear a short distance on line with the other troops and bivouacked for the night. This was the most crushing defeat of the war for the rebel army, and Hood's command never rallied.

17. Cannonading in the distance to the front. Cavalry in pursuit of the rear guard of Hood's army. Squads of prisoners marching to the rear. Three days' rations issued. Rain during the night.

To the right there was a locust grove, the trees from two to four inches in diameter. Shot to pieces and cut down by musket balls. On the outside of the works the graves are very thick as far as can be seen from the road. Three pieces of artillery and a rebel flag, captured by the cavalry, passed to the rear. “HEADQUARTERS. FOURTH ARMY CORPS,
“NASHVILLE, TENN., June 7, 1865.

“GENERAL ORDERS, /
“No. 21. }

“To the officers and soldiers of the regiments of 1862, who are about to leave us, the general commanding the corps desires to tender his congratulations upon their past proud career and good wishes for their future prosperity and happiness. Coming into service at a period of the war when success seemed doubtful —after all the illusions of excitement and first impressions, that war was all pomp and glory, had worn off —you, from the beginning of your service, pretty fully realized the stern, hard task before you, and well have you performed that task. In all that constitutes a veteran soldier, you are not one whit behind any soldier in our great army. In this army particularly, your regiments have passed through all the important battles fought by the Army of the Cumberland. How much influence these battles have had in destroying the great rebellion of this century, history must determine. Of the award, these regiments of '62 will have a full share. The rebellion is ended, and you leave us for your homes. Brought up, as our young men of the North are, to industry and self-exertion, you will find it no inconvenience or hardship to exchange the discomforts of camp and the vicissitudes of military life for the peaceful avocations of the citi-

zen. We part with you in sorrow, and will, until the end of life, cherish you in our memories as our brave, amiable and constant friends and companions in arms.

“ By command of Major-General D. S. Stanley.

“ WILLIAM H. SINCLAIR,

“ *Assistant Adjutant-General.*

“ Official :

“ ——— ———,

“ *Assistant Adjutant-General.*”

General Wood, commanding our division, also issued the following order. General Samuel Beatty, commanding our brigade, issued a like order for the brigade, but the original of this order we have not been able to find :

“ HEADQUARTERS THIRD DIVISION,

“ FOURTH ARMY CORPS,

“ NEAR NASHVILLE, TENN., June 6, 1865.

“ (GENERAL ORDER)

“ No. 47. \

“ *To the Officers and Soldiers of the 89th Illinois Vols., 93d and 124th Ohio Vols., 79th and 86th Indiana Vols. :*

“ The order from the War Department, directing the muster-out of the troops whose terms of service expire before a certain date, will soon terminate the official relation which has so long existed between us. I contemplate the approaching separation with feelings of sadness, and I can not allow it to take place without expressing my warmest thanks and sincere gratitude for the noble conduct which you have ever displayed while under my command. Participation in common dangers, and in privations and hardships,

has united us in the bonds of an indissoluble friendship. I will ever cherish, as among the brightest passages of my life, the memory of our past association. You have done your duty as good soldiers and patriots, engaged from the highest motives, in the holiest of causes. You can now return to your homes with the happy reflection that the mission which called you into the field, namely, the suppression of the armed resistance of treason and rebellion to the government, has been fully, nobly, honorably accomplished. Noble soldiers, your work is finished, now rest from your labors. Each one of you will carry home with you my highest esteem and kindest wishes for your future welfare. May happiness, prosperity, health and success wait on you throughout the remainder of your lives. May your future be as happy as your military life has been glorious! To each one of you, individually, and to all collectively, I bid a kind, a friendly good-bye. God bless you!

“TH. J. WOOD,

“*Major-General Volunteers.*”

“Official :

“M. P. BESTOW,

“*Captain and Assistant Adjutant-General.*”

FINAL SEPARATION.

Monday morning, June 11, 1865, the muster-out rolls had been signed and delivered, and the men of the 79th Regiment assembled at Camp Carrington, in the city of Indianapolis, to be paid off. They drew their pay for the last time, which is the last act they were ever to perform as members of that regiment. The officers and men are now in the same rank. No one is any longer subject to command or authority.

They are no longer soldiers, but citizens. The hour they had so long desired to see had come. They no longer had any guns, accoutrements, knapsacks, haversacks or canteens. They can no longer make requisitions or draw rations.

The situation at this moment was a little embarrassing. These men, who have drilled, marched, camped, associated and been in many battles together for a long time, must now separate. Crowding into the mind of every man were the recollections of past experiences of fun, hardships, hard services, dangers, dead comrades, warm regards for the survivors, the longed-for pleasures of home, civil life, of freedom and the anxiety for the future.

They stand about in groups for a few moments rather awkwardly, not waiting for the bugle to call them to drill, or to strike tents and break camp. They are well aware that no further duty is required of them. They can not stay there; they must be off, each man to what seemed to be almost a new life.

They are no longer under any conditions of war. This is peace—blessed peace, which they realized now as they had never done before in its full force. With moistened eyes and choking voices they closed the scene, mingled together for a moment, shook hands, said good-bye and were gone.

More than thirty-four years have passed since that day. Many of those men no longer answer to roll-call in our regimental reunions, and the rolls are rapidly becoming smaller. None of the men are any longer young or possess the vigor they once displayed; they can and are entitled, in advancing years, to enjoy the pleasure that comes from the reflection that, in their early manhood, they did their duty and took whatever

hazard it involved in maintaining the government of the United States.

Their children can look with pleasure upon this record of their fathers' faithful service. They may not have the opportunity to do like service for the government, but there will come to them constant opportunities to show their fidelity and courage in protecting the interests of their government in many ways as important, patriotic and valuable.
